Growers of fruits and vegetables and the fruit generally ripens earlier ion, and this is one of the things or crash. A straightline frock of natare appreciating more and more the than-if the plants are allowed to grow that still may be said of the gingham benefits possible through organization in the natural way. In pruning the frock. The price of gingham is now in marketing their products. It is plants all side shoots and suckers are considerably lower than it has been estimated that there are 14,000 removed, leaving only the main stem for two or three years. farmers' cooperative buying and sell- with its leaves and clusters of fruit. The prettiest dresses of this fabric ing associations in the United States It is easy to determine which are the are simple, the beauty of such a dress of which about 2,000 represent fruit side shoots and which are the young lying in the selection of colors and and vegetable interests.

Will Find Bureau Grades Helpful. Where the association is organized where the leaf joins the stem, while for the purpose of selling, the the fruit clusters appear on the naked ent craze for dull, black silk dresses, that some standard must be adopted for marketing their products. Individuals or organizations will find the recommended or proposed grades formulated by the bureau of markets, ture, very helpful as a basis for their packs or brands.

One Florida truck growers' association adopted this past season the tentative United States grades for cucumbers as a basis for their "Fancy" and "Choice" packs, marketing them under their leading brand. An investigator of the bureau of markets inspected the association pack and the individual shipper's pack and advised with them when any doubtful points concerning grades were raised. This inspection service gave the bureau of markets an opportunity to determine in the field whether the grades as formulated would be practical, at least under Florida conditions. The association packed all cucum bers through a central packing shed,
